- This animal can grow to be up to 20 feet long
- Can be found in estuaries and other coastal areas of south Florida
- They are carnivores and primarily eat fish, crabs, and small mammals
- This animal is a reptile

Answer on next slide

A close-up photograph of an American crocodile resting in a pool of water. The crocodile's head is the central focus, showing its textured, greyish-brown scales and a row of sharp, white teeth. The water is dark and reflects the surrounding environment. In the foreground, there are some rocks and a piece of wood. A white rectangular text box with a black border is overlaid on the left side of the image, containing the text 'AMERICAN CROCODILE'. The text is in a bold, black, sans-serif font. There are also some decorative elements: a zigzag line in the top left corner and a small green circle on the left side of the text box.
