## Mini Maze

Help the snail kite reach its prey, the apple snail.

The snail kite has red eyes that act as polarized sunglasses to spot the apple snail.

The snail kite's nest is in Cypress trees at the Preserve.

Its curved beak allows it to easily remove the apple snail from its spiraled shell.

### Get to Know Grassy Waters Preserve:

 Grassy Waters Preserve is a 15,000 acre Everglades habitat, which is the same size as about 11,500 football fields!

 The Everglades is a wetland, which means the habitat is often covered with water.

 The Preserve is home to many animals, such as alligators, wading birds, frogs, snakes, raccoons, bobcats, and otters.

 Grassy Waters Preserve provides drinking water for the City of West Palm Beach and surrounding communities.

 Explore Grassy Waters through canoeing, dip netting, & arts and crafts. To learn more visit our website at [wpb.org/grassywaters](http://wpb.org/grassywaters) or call us at 561-804-4985.
